ABT R8

THE ABT R8.

VENTURED A LITTLE, BUT GAINED A LOT

When in September 2006 the Audi R8 was presented to the public, there was only one question: can you really improve this dream of a car any further? We have taken the challenge. Now we know you can do it. Or rather: we can do it. Thanks to the full range of ABT know-how, all of ABT racing experience and not least – thanks to 100% passion.

THE ABT *R8*.

OUR MASTERPIECE

A front skirt bursting with power. An extravagant rear wing and a rear skirt which seem to say mainly one thing: bye bye baby. Purpose-made side blades and side skirts. And lots of carbon fibre on display. If you get teary eyes looking at this masterpiece, you can be at least sure of one thing: thanks to 530 hp, 550 Nm and 311 km/h top speed, they will dry faster than you would think.

ABT CR SUPERLIGHT – Even lighter, even sportier.
ABT's first forged rim on the market.

ABT Power R compressor conversion to 530 hp/550 Nm.

THE ABT *R8 SPYDER*.

JUST LIKE IN HEAVEN. BUT RIGHT HERE ON EARTH.

It has everything that distinguishes the ABT R8 – the power, the look, the extravagance, the incredible acceleration and the breathtaking performance. But its magical charm lies in that which it doesn't have. Exactly that is what gives those who drive it the feeling of unlimited freedom and the certainty of knowing: not even flying feels better than this.
