MORE POWER. MORE FUN. GUARANTEED.

ABT ENGINE TECHNOLOGY

The requirement to bring out the best in every engine is part of ABT's family tradition. Where performance upgrades and optimization of the motor management (**ABT POWER**) are concerned we are in our element and clearly the world's number one for cars by the VW group. Thanks to the experience we have acquired in our many years of professional racing, we are aware that not only power is important, but also durability. **More power. No change of emissions category.** Despite the increase in power, your CO₂ emissions do not increase! And your car remains in the same emissions category as before.

ABT AERODYNAMICS

If you rate extraordinary dynamics as high as individuality, then you have found the perfect pit crew in the ABT team. Our designers, engineers, technicians and model makers work hand in hand, and the result is definitely highly respectable: a tuning program developed by our company, from the front spoiler to the rear skirt, which we can use to transform your series production vehicle into an impressive character performer. Please also pay attention to our favourable ABT Aero kits.

ABT EXHAUST TECHNOLOGY

Impressive power is turned into optical and acoustical enjoyment: Thanks to extensive development work and double-walled stainless steel design, ABT rear mufflers always put on an impeccable performance.

ABT SUSPENSION

It is only the right suspension that makes higher engine power pure pleasure. Also in this field we bring our entire racing experience and hence absolute cutting-edge technology onto the road. ABT suspension springs lower the vehicle and provide for dynamic looks and more stable road holding. For more safer and comfortable driving pleasure made by ABT.

ABT BRAKES

Driving in a sporty way is great fun but only if you know for sure that any time you want you can bring your car to an immediate standstill. ABT steel-flex brake lines are tested constantly under severe conditions and therefore provide this feeling of certainty. With an ideal pressure point, excellent regulable application and an optimal braking distance – but with significantly less fading, in other words: no decrease in braking power under long-term stress. Thus, ABT brake systems bring everything reliably to a standstill. Except, of course, your driving pleasure.

ABT SPORTS WHEELS

Elegant or dynamic, modern or classical, silver or titanium – but always professionally balanced down to the last detail as far as weight and handling are concerned – ABT sports wheels perfectly round off the individual performance of your car. After all, they clearly show at a glance that they conform with the highest of demands both on the road and on the racing track and that they do not only look good but also want to be driven.

ABT DR sports wheel.
Optimised weight, perfect concentricity, revolutionary design. The first ABT wheel with relieved rim base. And the only one with gun metal finish.

THE ABT BEETLE

SIMPLY IRRESISTIBLE.

At first sight the new Beetle by ABT seems restrained. But what it has hidden under its bonnet is anything but tranquil. Behind its harmless-looking façade there's a real turbo beetle that just loves to be let loose. At VW the powerful 2-litre TSI engine delivers 200 hp – the tuned version achieves an exceptional 240 hp. That makes the ABT version the sportiest Beetle of all time. Or in other words: a fun car with the ambition of a champion.

ABT front spoiler. Exclusive design. Sporty character. Perfectly fitted aerodynamics.

ABT headlight covers. A real eye catcher.

ABT tail light covers. Leaves a lasting impression.
