# MORE POWER. MORE FUN. GUARANTEED.

## ABT ENGINE TECHNOLOGY

The aspiration to bring out the best in every engine is part of ABT's family tradition. When it comes to increasing power output by optimizing the engine management system by means of chip tuning (**ABT POWER**) we are in our element and clearly the world's number one for cars from the VW Group. And thanks to the wealth of experience we have acquired in our many years in professional racing, we are fully aware that it's not only power that is important but durability, too. **More power. No change of emissions category.** Despite the increase in power, your CO<sub>2</sub> emissions do not increase! And your car remains in the same emissions category as before.

## ABT AERODYNAMICS

If you rate extraordinary dynamics as high as individuality, then you have found the perfect pit crew in the ABT team. Our designers, engineers, technicians and model makers work hand in hand, and the result is definitely highly respectable: a tuning program developed by our company, from the front grill to the rear wing, which we can use to transform your series production vehicle into an impressive character performer.

## ABT EXHAUST TECHNOLOGY

Impressive power is turned into optical and acoustical enjoyment: Thanks to extensive development work and double-walled stainless steel design, ABT exhaust systems and rear mufflers always put on an impeccable performance. The particular masterpiece: diesel rear mufflers specially designed for selected cars which make the diesel models' usually rather subdued voices considerably more impressive.

## ABT SUSPENSION

It is only the right suspension that makes higher engine power pure pleasure. Also in this field we bring our entire racing experience and hence absolute cutting-edge technology onto the road. ABT suspension springs lower the vehicle and provide for dynamic looks and more stable road holding. In addition, ABT adjustable sport suspensions can be adjusted in height and, depending on the version, also in rebound and compression. For more safer and comfortable driving pleasure made by ABT.

## ABT BRAKES

Driving in a sporty way is great fun but only if you know for sure that any time you want you can bring your car to an immediate standstill. ABT steel-flex brake lines are tested constantly under severe conditions and therefore provide this feeling of certainty. With an ideal pressure point, excellent regulable application and an optimal braking distance – but with significantly less fading, in other words: no decrease in braking power under long-term stress. Thus, ABT brake systems bring everything reliably to a standstill. Except, of course, your driving pleasure.

## ABT SPORTS WHEELS

Elegant or dynamic, modern or classical, silver or titanium – but always professionally balanced down to the last detail as far as weight and handling are concerned – ABT sports wheels perfectly round off the individual performance of your car. After all, they clearly show at a glance that they conform with the highest of demands both on the road and on the racing track and that they do not only look good but also want to be driven.

# THE ABT SCIROCCO.

## THEY SOW THE WIND ...

... and reap the whirlwind. Or in this case, a uniquely sporting, on-road experience. Named after a hot Saharan-Mediterranean wind, the Scirocco kicked up a real storm – of praise and market appreciation – when it first debuted back in 1974. Now, it's celebrating its comeback – and like a breath of fresh air: with increased power ratings up to 240 hp, elegantly aerodynamic add-on body components, dynamic chassis and suspension technology and much much more, the experts at ABT have breathed yet more life into the latest generation of this spectacular sports coupe. But the ABT Scirocco is also fully on message with the wind of change: the 1.4 TSI engine, for instance, churns out a massive 210 hp – more power than the larger 2.0 TSI power unit in its series-production form – while offering a significant reduction in fuel consumption at the same time.

ABT rear muffler. Made of stainless steel, with four chrome tailpipes.

ABT front skirt. Energy-laden exclusivity in OEM quality.

ABT interior. Sporty interior with aluminium pedals and foot rest, leather gear shift knob and steering wheel tag with logo.

ABT BR sports wheel. Diamond-machined, deepblack matt finished or high-gloss polished with optional concealed valves, weight-optimized and providing perfect handling.
