# ABT®

ANW022/1

# MORE POWER. MORE FUN. GUARANTEED.

## ABT ENGINE TECHNOLOGY

The requirement to bring out the best in every engine is part of ABT's family tradition. Whether the task in hand is chip tuning (**ABT POWER**), optimization of the motor management plus turbo charger (**ABT POWER S**) – where performance upgrades are concerned we are in our element and clearly the world's number one for cars by the VW group. Thanks to the experience we have acquired in our many years of professional racing, we are aware that not only power is important, but also durability. **More power. No change of emissions category.** Despite the increase in power, your CO<sub>2</sub> emissions do not increase! And your car remains in the same emissions category as before.

## ABT AERODYNAMICS

If you rate extraordinary dynamics as high as individuality, then you have found the perfect pit crew in the ABT team. Our designers, engineers, technicians and model makers work hand in hand, and the result is definitely highly respectable: a tuning program developed by our company, from the front grill to the rear wing, which we can use to transform your series production vehicle into an impressive character performer. Please also pay attention to our favourable ABT Aero kits.

## ABT EXHAUST TECHNOLOGY

Impressive power becomes a visual pleasure: thanks to complex development and stainless steel design, ABT exhaust tips always cut a clean figure.

## ABT SUSPENSION

It is only the right suspension that makes higher engine power pure pleasure. Also in this field we bring our entire racing experience and hence absolute cutting-edge technology onto the road. ABT suspension springs lower the vehicle and provide for dynamic looks and more stable road holding. By means of the ABT Level Control (ALC) the air suspension of your car can be electronically lowered and the driving dynamics adjusts depending to your individual requirements – from sporty to especially comfortable.

## ABT BRAKES

Driving in a sporty way is great fun but only if you know for sure that any time you want you can bring your car to an immediate standstill. ABT steel-flex brake lines are tested constantly under severe conditions and therefore provide this feeling of certainty. With an ideal pressure point, excellent regulable application and an optimal braking distance – but with significantly less fading, in other words: no decrease in braking power under long-term stress. Thus, ABT brake systems bring everything reliably to a standstill. Except, of course, your driving pleasure.

## ABT SPORTS WHEELS

Elegant or dynamic, modern or classical, silver or titanium – but always professionally balanced down to the last detail as far as weight and handling are concerned – ABT sports wheels perfectly round off the individual performance of your car. After all, they clearly show at a glance that they conform with the highest of demands both on the road and on the racing track and that they do not only look good but also want to be driven.

You can find the ABT configurator and further information at [www.abt-sportslines.com](http://www.abt-sportslines.com)

**ABT DR sports wheel.**  
Optimised weight, perfect concentricity, revolutionary design.  
The first ABT wheel with relieved rim base. And the only one with gun metal finish.

**ABT CR sports wheel.**  
Mystic anthracite matt. Diamond-machined and with optimum concentricity.

# THE ABT TOUAREG II.

## UNRIVALLED. INDESTRUCTIBLE.

As fast and elegant as a cheetah. As robust as a rhinoceros. The new ABT Touareg II simply has the best of everything. ABT grille, rear spoiler and rear skirt in diffuser look with quadruple exhaust tips. And, of course, the matching ABT BR, CR or DR rims in sizes up to 22 inches. At the very first glance you know – this car is not just meant for fun. It's pure adrenalin. And the first time you push the accelerator – you are absolutely certain. At 3.0l TDI we are talking about 310 hp that take you directly where you want to go – thanks to ABT Power S.

**ABT front grille.** For maximum dynamism and character.

**ABT rear skirt.** In diffuser look with exhaust tips.

**ABT sports wheels.** In sizes up to 22 inches from the BR, CR or DR series.
